

Enterprise AI Discovery

For businesses in Zambia that handle mobile money, WhatsApp and ZRA paperwork every day. Four hours at your office. We work on your actual files and you leave with one automation that is already running.

WHAT HAPPENS

Before: you send two files on WhatsApp. A MoMo settlement sheet and a complaint or invoice log. We use Zambrate Edu to build the session from your files.

4 hour live lab at your office. No slides. We fix your sheet live, build the first automation and test it on your data.

You keep: cleaned file, one working automation, a short plan for Mesa shared inbox and CRM, and a one page ROI note.

After: two weeks of support on WhatsApp. Daily quiz from your own manual, weekly check on prompts, Champions certificate.

WHO IT IS FOR

Teams of 3 to 8 people who do the same tasks every week. Finance, customer care, sales, operations. Works for any business, from betting shops to shops, logistics, clinics, schools.

Data stays in Zambia. We can run a small model offline so sensitive IDs and NRCs do not go to US clouds. This matches Data Protection Act 2021 section 70.

PRICE

K10,000 flat for up to 8 staff. 50% Airtel Money or bank to lock the date, 50% morning of training. Proforma and ZRA e-invoice included. Certificate released after full payment.
