

Teach your team to use AI on the work they already do

Half a day at your office, built on two or three tasks your staff do every week. They leave doing those tasks faster, with templates to keep. Buying AI software before anyone knows what to do with it usually means paying for something nobody opens. So start smaller.

HOW IT WORKS

We come to your office for half a day. You pick two or three tasks that happen every week. We work on those tasks live with your team.

One team, up to 15 staff. No need for a projector. We bring UPS and Starlink backup for power cuts.

The people teaching it build Zambrate AI in Lusaka. Same tools, same problems.

WHAT YOU KEEP

Templates you can use the next day. Cleaned example of your own sheet. Short notes on what to do next.

PRICE

K3,500 flat per team. Lusaka and Copperbelt. 50% MoMo to book. Proforma and ZRA e-invoice.
